

# FORT DRUM CONNECTOR PROJECT

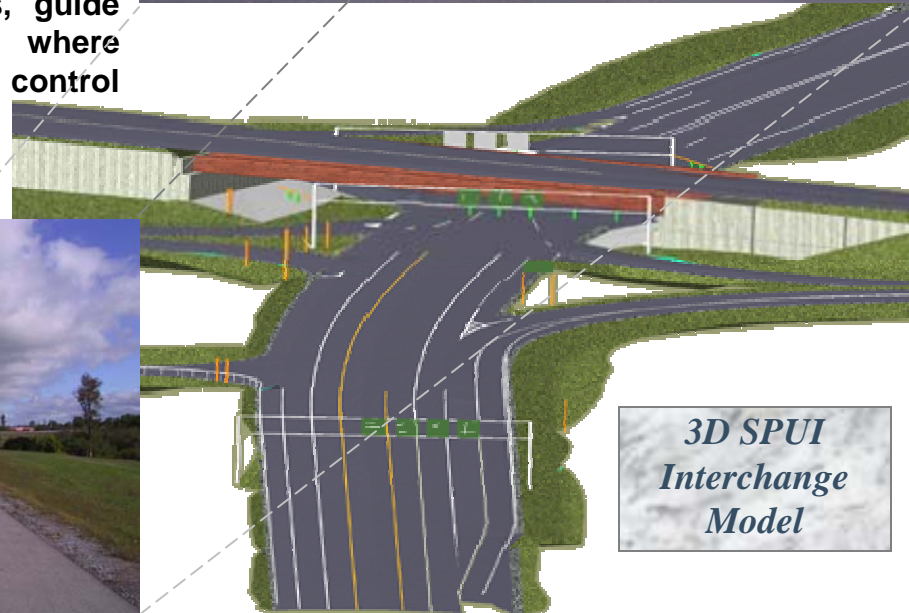

Jefferson County, New York

Bryant Associates assisted sub-consultant with wetland determination studies, prepared portions of the EIS Section IV and prepared the Visual Impact Assessment (VIA). Bryant Associates prepared over 25 ground view photo simulations for the Corridor Alternatives which were incorporated into the VIA. Bryant used GPS survey with post-processing for the 3D photo control. Bryant Associates developed 3D models of the corridor features including bridges, sign structures, guide rail and lighting which were rendered into the control photographs.
